

Write a function to assign grades to employees based on their salary:

```
DELIMITER //
CREATE FUNCTION GetEmployeeGrade(emp_salary INT) RETURNS CHAR(1)
DETERMINISTIC
BEGIN
DECLARE grade CHAR(1);
IF emp_salary <= 10000 THEN
SET grade = 'D';
ELSEIF emp_salary <= 30000 THEN
SET grade = 'C';
ELSEIF emp_salary <= 60000 THEN
SET grade = 'B';
ELSE
SET grade = 'A';
END IF;
RETURN grade;
END //
DELIMITER ;
SELECT first_name, salary, GetEmployeeGrade(salary) AS Grade FROM
employee;
```

Result Grid     Filter Rows: <input type="text"/>			
	first_name	salary	Grade
▶	Rahul	56000	B
	Parvin	25000	C
	Naresh	8000	D
